Programming Languages & Platform

- Html5
- Css3
- JavaScript

- Typescript
- React JS
- Redux
- Next JS

TOOLS:

- visual studio code
 - Atom
 - Sublime Text
-

EDUCATIONAL QUALIFICATIONS:

Bachelor of Engineering in computer science.

Hindustan institute of technology.

YEAR: 2015-2019.

WORK EXPERIENCE:

COMPANY : Capecom Solutions Sep 2023 –Present

ROLE : React Developer

PROJECT NAME : E-commerce Web Application

PROJECT OVERVIEW:

Developed a comprehensive e-commerce platform for an online retail store, facilitating user-friendly shopping experiences and efficient order management.

KEY RESPONSIBILITIES:

FRONTEND DEVELOPMENT: Utilized React.js, Redux, and Material-UI to create dynamic and responsive user interfaces.

FORM MANAGEMENT: Implemented React Hooks Form for effective form validation and data fetching.

STATE MANAGEMENT: Managed application state with Redux for efficient and predictable state transitions.

COMPONENT DESIGN: Designed reusable UI components using Material-UI, ensuring consistent design and enhanced user experience.

USER AUTHENTICATION: Integrated secure authentication and authorization mechanisms for user accounts and admin access.

PRODUCT LISTINGS: Created dynamic product listing pages with search, filtering, and sorting functionalities.

SHOPPING CART & CHECKOUT: Developed a seamless shopping cart and checkout process, including payment gateway integration.

ERROR HANDLING: Implemented robust error handling and validation for forms and API interactions.

RESPONSIVE DESIGN: Ensured cross-device compatibility with responsive design techniques.

TECHNOLOGIES USED: React.js, Redux, Material-UI, React Hooks Form, HTML, CSS, JavaScript.

COMPANY NAME: Accenture

Oct 2022-Feb 2023

ROLE : Web Developer

PROJECT NAME : Migrating the Microsoft pages.

PROJECT OVERVIEW:

Developed a comprehensive form-based web application for data collection and management, focusing on user-friendly interfaces and robust validation mechanisms.

COMPANY: SB Software Solution

Dec 2021- Sep 2022

ROLE: WEB DEVELOPER

PROJECT NAME: Form-Based Applications

KEY RESPONSIBILITIES:

FRONTEND DEVELOPMENT: Utilized HTML, CSS, and JavaScript to create dynamic and responsive form interfaces.

FORM DESIGNS: Designed and implemented various forms, including registration, login, contact, and feedback forms, ensuring usability and accessibility.

VALIDATION: Developed client-side validation using JavaScript to ensure data accuracy and integrity before submission.

USER EXPERIENCE: Enhanced user experience by implementing real-time feedback, such as form field validation messages and dynamic form field visibility.

RESPONSIVE DESIGN: Ensured the forms were fully responsive and compatible with different devices and screen sizes using CSS media queries.

STYLING: Applied custom CSS for styling form elements, achieving a consistent and visually appealing look across all forms.

JAVASCRIPT INTEGRATION: Utilized JavaScript for dynamic form behaviours, including conditional fields, auto-completion, and interactive elements.

ERROR HANDLING: Implemented error handling mechanisms to provide clear and user-friendly error messages.

ACCESSIBILITY: Ensured forms were accessible to all users, including those with disabilities, by following best practices for web accessibility.

TECHNOLOGIES USED: HTML, CSS, JavaScript.
